Detailed Office Action

1. Claims 1-20 are pending.

Allowable Subject Matter

2. The indicated allowability of claims 1-20 are withdrawn in view of the newly discovered reference(s) to Matsumoto et al., 6,498,965. Rejections based on the newly cited reference(s) follow.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 15, and 16 of the instant application is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over some claims of Matsumoto et al (Hereafter, Matsumoto), U.S. Patent No. 6,498,965. Although the conflicting claims are not identical, they are not patentably distinct from each other because modifications are obvious.

Regarding claim 1, claim 1 of U.S. Pat. No. 6,498,965 recites all limitations in claim 1 [see Col. 12, Lines 56 to Col.13, Line 14]. It does not explicitly teach memorizing means for memorizing the first mentioned control program ad a memorized control program. However, Matsumoto, in the same Patent discloses a second storing means for storing rewriting program [see Matsumoto, Col. 13, Lines 1-8]. Memorizing means and storing means are functionally equivalent since they all provide storing previous data information/program in a communications network.

Regarding claim 15, claim 2 of U.S. Pat. No. 6,498,965 recites all limitations in claim 15 [see Col. 13, Lines 15-19].

Regarding claim 16, claim 1 of U.S. Pat. No. 6,498,965 recites all limitations in claim 1 [see Col. 12, Lines 56 to Col.13, Line 14]. It does not explicitly teach memorizing means for memorizing the first mentioned control program as a memorized control program. However, Matsumoto, in the same Patent discloses a second storing means for storing rewriting program [see Matsumoto, Col. 13, Lines 1-8]. Memorizing means and storing means are functionally equivalent since they all provide storing previous data information/program in a communications network.
